GENERAL ASSEMBLY
Fiftieth session
Agenda item 8
ADOPTION OF THE AGENDA AND
ORGANIZATION OF WORK

SECURITY COUNCIL
Fiftieth year

Letter dated 10 October 1995 from the Permanent Representative of Croatia to the United Nations addressed to the Secretary-General

My Government expresses its objection to the publication of any documents of the United Nations signed by Mr. Jovanovic as "Chargé d'affaires a.i. of Yugoslavia". Mr. Jovanovic is not representing a Member State of the United Nations and thus has no authority to request the publication of documents.

The designation of "Yugoslavia" as a State within the framework of the United Nations is related to the former Socialist Federal Republic of Yugoslavia, a State whose process of dissolution into five successor States was initiated on 8 October 1991, and was concluded on 27 April 1992, with the "Federal Republic of Yugoslavia (Serbia and Montenegro)" being formed as the last of the new States (European Union (EU) Arbitration Commission opinion No. 11 of 16 July 1992). The Republic of Bosnia and Herzegovina, the Republic of Croatia, the Republic of Macedonia, the Republic of Slovenia and the "Federal Republic of Yugoslavia (Serbia and Montenegro)" are all equal successors to the former Socialist Federal Republic of Yugoslavia. None of the successor States can claim to be the sole continuation of the former Socialist Federal Republic of Yugoslavia, nor can it claim for itself the membership rights in the international organizations previously enjoyed by the former Socialist Federal Republic of Yugoslavia [EU Arbitration Commission opinion No. 9]. In addition, the EU Arbitration Commission decided that the "Federal Republic of Yugoslavia (Serbia and Montenegro)" is "a new State which cannot be considered the sole successor of the Socialist Federal Republic of Yugoslavia" [Opinion No. 10].

The relevant resolutions of the Security Council (777 (1992) and 821 (1993)), and of the General Assembly (47/1), have stated clearly and unequivocally that the "State formerly known as the Socialist Federal Republic of Yugoslavia has ceased to exist", that the Federal Republic of Yugoslavia

(Serbia and Montenegro) cannot continue "automatically the membership of the former Socialist Federal Republic of Yugoslavia", and that "the Federal Republic of Yugoslavia (Serbia and Montenegro) should apply for the membership of the United Nations". Since the "Federal Republic of Yugoslavia (Serbia and Montenegro)" has not yet applied for membership in the Organization, it can only be concluded that it is not a Member State.

Further, we wish to recall that Mr. Dragomir Djokic, previous "Chargé d'affaires of the Permanent Mission of Yugoslavia to the United Nations", was appointed by the then Acting Federal Secretary for Foreign Affairs of the Socialist Federal Republic of Yugoslavia, Mr. Milivoje Maksic, on 31 March 1992 - prior to the succession of the "Federal Republic of Yugoslavia (Serbia and Montenegro)" to the former Socialist Federal Republic of Yugoslavia.

In the light of this situation, and until the "Federal Republic of Yugoslavia (Serbia and Montenegro)" decides to apply and is admitted into membership of the United Nations, Mr. Djokic was being allowed to act as a representative of "Yugoslavia" within the United Nations system, since he was appointed at a time when the Socialist Federal Republic of Yugoslavia still existed as a State, by a then legitimate representative of that State. However, Mr. Jovanovic cannot be considered as a representative of any "Yugoslavia", since he was appointed by the Minister for Foreign Affairs of a country that is not a Member State of the United Nations.

I would like to request your assistance in distributing this letter as a document of the fiftieth session of the General Assembly under item 8, and of the Security Council.

(Signed) Mario NOBILO
Ambassador
Permanent Representative

STRENGTHENING OF THE COORDINATION OF HUMANITARIAN AND DISASTER RELIEF ASSISTANCE OF THE UNITED NATIONS, INCLUDING SPECIAL ECONOMIC ASSISTANCE: STRENGTHENING OF INTERNATIONAL COOPERATION AND COORDINATION OF EFFORTS TO STUDY, MITIGATE AND MINIMIZE THE CONSEQUENCES OF THE CHERNOBYL DISASTER

Letter dated 9 October 1995 from the Permanent Representative of Ukraine to the United Nations addressed to the Secretary-General

I have the honour to transmit herewith the appeal of the Government of Ukraine to the Governments of the nations of the world concerning scientific, technical and financial support in establishing and developing the activities of the International Scientific and Technological Centre for Nuclear and Radiological Accidents (see annex).

I should be most grateful if you would circulate the present letter and its annex as a document of the General Assembly, under agenda item 20 (c).

ANNEX

[Original: Russian]

Appeal by the Government of Ukraine to the Governments of the nations of the world concerning scientific, technical and financial support for the establishment and activities of an International Scientific and Technological Centre for Nuclear and Radiological Accidents

We shall soon mark the tenth anniversary of the accident at the Chernobyl nuclear power plant, which in terms of its scale, its impact on the environmental situation and its socio-economic consequences reached far beyond Ukraine and became a global issue of our time. Ukraine experienced the full tragedy of the nuclear disaster and understands the concern of public opinion all over the world regarding the continued operation of the plant.

With this in mind, the Government of Ukraine has taken a crucial decision on the possibility of decommissioning the Chernobyl nuclear power plant by the year 2000. Ukraine is, however, in no condition to implement such a wide-ranging programme since it entails enormous economic expenditure.

Unfortunately, owing to various political and economic circumstances, during the nine years that have elapsed since the Chernobyl disaster it has proved impossible to establish an effective system for making a systematic study of all its consequences. Moreover, the unwillingness even of industrially developed States to react appropriately and to take effective countermeasures to deal with the consequences of this global misfortune has been amply demonstrated.

In view of the foregoing, the Government of Ukraine deems it extremely important, in the interests of all mankind, that a thorough and in-depth study should be undertaken of the lessons of the Chernobyl accident and of how its consequences could be dealt with so as to avoid a repetition of similar disasters in the future and mitigate significantly the consequences of potential incidents at nuclear power plants. The unique conditions and features of the Chernobyl zone provide an opportunity for the working out of practical approaches, the formulation of measures designed to prevent nuclear accidents, and the development of special technologies to minimize and eliminate the consequences of nuclear and radiation accidents, clean up environmental contamination, decommission nuclear installations, and so forth.

In order to create proper conditions for research work by specialists from interested States and international scientific centres on the implementation of scientific research programmes in the areas of nuclear and radiological safety, accident prevention, procedures for dealing with the consequences, and environmental clean-up, and also with a view to conducting radio-ecological and medical-biological research, the Government of Ukraine proposes to establish an International Scientific and Technological Centre for Nuclear and Radiological Accidents. The establishment of such a centre would make it possible to address a whole range of issues associated with preparations for and the subsequent

carrying out of the decommissioning of the Chernobyl nuclear power plant, turning the "Shelter" unit into an environmentally safe system and resolving the question of how to deal with a considerable quantity of radioactive waste.

Having endorsed the concept of the establishment and activities of the International Centre - in which the interests of the Ukrainian side have been indicated - and wishing to create the most favourable conditions for multilateral cooperation within the scope of this centre, the Government of Ukraine hopes to receive suggestions regarding the orientation of scientific research, the organization of work and the participation of representatives of foreign States in its activities.

On the eve of the tenth anniversary of the accident at the Chernobyl nuclear power plant, the Government of Ukraine requests the Governments of all States of the world, international organizations and financial institutions, and the directors of research centres and laboratories - all those concerned about the fate and future of mankind - to take part in the establishment and activities of the International Scientific and Technological Centre for Nuclear and Radiological Accidents.

GENERAL AND COMPLETE DISARMAMENT: TRANSPARENCY IN ARMAMENTS

United Nations Register of Conventional Arms

Report of the Secretary-General

CONTENTS

		Page
I.	INTRODUCTION	2
II.	INFORMATION RECEIVED FROM GOVERNMENTS	3
	A. Composite table of replies of Governments	5
	B. Replies received from Governments	9
III.	INDEX OF BACKGROUND INFORMATION PROVIDED BY GOVERNMENTS FOR THE CALENDAR YEAR 1994	69

95-31040 (E) 271095 301095

I. INTRODUCTION

1. On 1 January 1992, the Secretary-General established the United Nations Register of Conventional Arms in accordance with General Assembly resolution 46/36 L of 9 December 1991, on transparency in armaments. In that resolution, the General Assembly called upon all Member States to provide annually for the Register data on imports and exports of conventional arms in the seven categories covered under the Register. It also invited Member States, pending the expansion of the Register, to provide to the Secretary-General, with their annual report on imports and exports of arms, available background information regarding their military holdings, procurement through national production and relevant policies, and requested the Secretary-General to record that material and to make it available for consultation by Member States at their request.

2. At its forty-seventh session, the General Assembly, by its resolution 47/52 L of 15 December 1992 on transparency in armaments, called upon all Member States to provide the requested data and information to the Secretary-General by 30 April annually, beginning in 1993, and encouraged Member States to inform the Secretary-General of their national arms import and export policies, legislation and administrative procedures, both as regards authorization of arms transfers and prevention of illicit transfers, in conformity with paragraph 18 of its resolution 46/36 L.

3. The Secretary-General has since issued two consolidated reports containing data and information provided by Governments on imports and exports of conventional arms covered under the Register - battle tanks, armoured combat vehicles, large-calibre artillery systems, attack helicopters, combat aircraft, warships, missiles and missile systems. The data and information provided by 92 1/ Governments for the calendar year 1992 and by 89 1/ Governments for the calendar year 1993 are contained in documents A/48/344 and Add.1-3 and A/49/352 and Add.1-4, respectively.

4. In addition to the consolidated report containing the replies by Governments to the Register of Conventional Arms, the General Assembly at its forty-ninth session had before it the report of the Secretary-General on the continuing operation of the Register and its further development, which had been prepared with the assistance of a group of governmental experts (A/49/316) pursuant to resolutions 46/36 L, 47/52 L, and 48/75 E of 16 December 1993.

5. The General Assembly, in its resolution 49/75 C of 15 December 1994 on transparency in armaments, took note of the report of the Secretary-General on the continuing operation of the Register and its further development. In the same resolution, the General Assembly decided to keep the scope of and participation in the Register under review, and to that end requested Member States to provide the Secretary-General with their views on the continuing operation of the Register and its further development and on transparency measures related to weapons of mass destruction. Those views are contained in

---

1/ In June 1995 Saint Lucia submitted a "nil" report for the calendar years 1992 and 1993.

document A/50/276 and Add.1. It also requested the Secretary-General, with the assistance of a group of governmental experts to be convened in 1997, on the basis of equitable geographical representation, to prepare a report on the continuing operation of the Register and its further development, taking into account work of the Conference on Disarmament, the views expressed by Member States and the 1994 report of the Secretary-General on the continuing operation of the Register and its further development, with a view to a decision at its fifty-second session.

6. In the same resolution, the General Assembly called upon Member States to provide the requested data and information for the Register, on the basis of resolutions 46/36 L and 47/52 L and the annex and appendices to the report of the Secretary-General on the continuing operation of the Register and its further development, to the Secretary-General by 30 April annually.

7. The present report is submitted in accordance with the request contained in General Assembly resolution 49/75 C. Thus far, 84 Governments have provided data and information for the calendar year 1994. 2/ The replies are contained in section II below. Any additional replies received from Governments will be issued as addenda to the present report.

8. In addition, section III of the report contains an index of the background information submitted by Governments in accordance with paragraphs 10 and 18 of General Assembly resolution 46/36 L and paragraph 5 of resolution 47/52 L. The background information is available at the United Nations Centre for Disarmament Affairs for consultation.

II. INFORMATION RECEIVED FROM GOVERNMENTS

9. Information received from Governments is presented in this section of the report as follows: (a) a composite table listing all the replies received by the Secretary-General, and (b) individual replies of Governments. Where appropriate, the relevant parts of notes verbales are also reproduced.

10. The composite table is provided for ease of reference. As regards the information contained in the table, it should be noted that a "yes" denotes a submission of data regarding imports and/or exports in relation to the seven categories of arms covered by the Register, during the reporting period. For the purpose of uniform tabulation, responses by Governments that contained either "nil", "none", "0", a dash (-), or which otherwise indicated that no exports and/or imports in the categories covered by the Register had taken place are reflected in the table as "nil" reports. A blank space under data on imports and/or exports in the composite table indicates that no information was provided. In some cases, however, an explanation can be found in the note verbale of the country in question, as indicated above.

2/ Although not included in this report, the Government of Latvia has submitted a partial return for the calendar year 1995.

11. In reviewing the technical requirements for reporting, the group of governmental experts convened in 1994 suggested attaching explanatory notes to the standardized forms for reporting international transfers. The model explanatory notes are contained in appendix III to the report of the Secretary-General on the continuing operation of the Register and its further development (A/49/316). The information thus provided is reflected in the individual replies of Governments as appropriate.

12. It should be noted that in order to comply as much as practicable with General Assembly resolution 34/50 of 23 November 1979 regarding the length of Assembly documentation, only standardized forms containing specific data and notes verbales of Governments providing relevant information are reproduced in part B of this section. Replies in standardized forms or in notes verbales containing "nil" or blank reports, as described in paragraph 10 above, are listed in the composite table only.

In addition to the data provided in the standard return, Australia provides the following background information of relevance to the Register of Conventional Arms:

Exports

In calendar year 1994, the only equipment exported by Australia which fell within the defined categories of the Register were two (2) Chrysler M-3 medium tanks, built in 1942-1943. These vehicles have not been included in the standard form because they were exported solely as museum exhibits (one to the Virginia Museum of Military Vehicles, Virginia, United States of America, and the other to the 2nd Armoured Division Museum, Texas, United States of America).

In addition, Australia exported the former training ship HMAS Jervis Bay to a civilian company in Greece for use as a cruise ship. This ship did not fall within the definition of a "warship" under category VI of the Register.

Imports

We have listed two (2) Newport-class Tank Landing Ships (LSTs) on our import form. In Australian service, these ships are designated training and helicopter support ships, named HMAS Manoora and HMAS Kanimbla. It is not absolutely clear whether such ships fall within the definition of a category VI "warship", but we have decided to include them because we consider that such ships are important components of naval force structure whose transfer should be declared to the Register.

Order of battle

We have provided the Secretariat with copies of the 1994 Defence White Paper, entitled Defending Australia, and the Department of Defence Annual Report 1993-1994. Information on Australia's order of battle may be found in pages 161-167 of Defending Australia, and pages 243-256 of the 1993-1994 Annual Report. These documents also contain information on Australia's defence policy and planning, defence expenditure, and the activities and capabilities of the Australian Defence Force and Defence Department.

AUSTRIA

[Original: English]

[1 May 1995]

As a point of clarification it should be mentioned that "Armoured combat vehicles (Category II)" used exclusively for experimental purposes and not for active use in combat units were not included in the statistics.

Background information

Large calibre artillery systems:

Austria bought altogether 117 pieces of United States-made M109 A2/A3 self-propelled howitzer from the United Kingdom in 1993/94. A number of some 83 pieces were distributed in 1994. The remaining pieces will be taken into account in next year's CAR-report, if the items are delivered in 1995 according to schedule.

Two older artillery pieces of United States-made M 30 which were reported in the 1993 data have been decommissioned and subsequently destroyed.

CROATIA

[Original: English]

[19 April 1995]

Bearing in mind the fact that Security Council resolution 713 (1991) is still in force, and maintaining its position as expressed in its notes verbales 15/93 of 30 April 1993, 19/93 of 5 May 1993 and 85/94 of 13 June 1994, the Republic of Croatia states that no import or export of armaments or military equipment has taken place, thus submitting a "nil report".

The reply of Germany also contained the following notes:

"Figures given for exports include items for demilitarization, destruction, disposal, as well as deliveries to the United Nations and allied forces stationed in Germany.

"According to the definitions of the resolution, only complete weapons or entire building kits were included; imports of deliveries of components to be used in arms production, including joint production, are not included. As temporary imports/exports for repair, exhibition, trial or presentation purposes also do not fall within the scope of the register, they were not included.

"Data include transfers by the Federal Armed Forces as well as by German industry.

"In Germany, arms production is part of the private sector. There are no public enterprises active in this field. Data provided are based on mandatory and checked information furnished by private enterprises.

"Background information on German export controls on armaments was submitted to the United Nations on 14 July 1992 and circulated in document A/47/370. Background information on national defence planning is attached. Updated background information as to defence and arms control policies will be submitted after publication of the respective annual reports.

"It becomes obvious from the figures that transfers mainly took place within the North Atlantic Treaty Organization (NATO). Deliveries to other countries were rather rare. This reflects the German arms export policy. Temporary increases in exports are due to transfer of equipment of the former German Democratic Republic armed forces mainly to other States parties to the Treaty on Conventional Armed Forces in Europe of 19 November 1990 and do not indicate any change in the restrictive export policies pursued by the Federal Government."

LIBYAN ARAB JAMAHIRIYA

[Original: Arabic]

[13 April 1995]

As a result of the coercive and unjust measures applied to the Great Jamahiriya under Security Council resolutions 748 (1992) and 883 (1993), which prohibit the sale of arms and related material of all types, including the sale or transfer of weapons and ammunition and of military vehicles and equipment, the Great Jamahiriya has not, since the resolutions in question took effect, imported, exported or transferred weapons of any kind.

PANAMA

[Original: Spanish]

[10 August 1995]

The Panamanian Government wishes to report that since January 1990 it has maintained no army or other armed forces of a military nature. In keeping with the provisions of Decree No. 38 of 10 February 1990, there exists only a police force which is responsible for ensuring strict compliance with the law.

Accordingly, the Republic of Panama neither possesses nor has acquired weapons of the types listed in the attached report.

Note: Equipment purchased from programmes in which the United Kingdom is a collaborative partner is declared as "Procurement from national production".

UNITED STATES OF AMERICA

[Original: English]

[28 April 1995]

Each year, the United States of America provides background information regarding relevant United States policies, legislation, and administrative procedures. The 1995 United States submission includes updates to this material.

It is possible that there will be discrepancies in the numbers of transferred arms as reported by exporting and importing States, owing to differences in recorded dates of transfer and in what each country determines to constitute a reportable transfer.

The United States considers that its transfers of military equipment occur at the time ownership title for the equipment is transferred between the United States and another country. The 1995 submission therefore includes equipment whose title was transferred during the calendar year 1994.

YUGOSLAVIA

[Original: English]

[18 April 1995]

The Permanent Mission of the Federal Republic of Yugoslavia to the United Nations has the honour to inform that the Government of the Federal Republic of Yugoslavia has neither imported nor exported arms during 1994, since, by Security Council resolution 713 (1991), an arms embargo was imposed on the territory of the former Socialist Federal Republic of Yugoslavia. Therefore, the reply should be interpreted as a "nil report" for the Federal Republic of Yugoslavia for 1994.

III. INDEX OF BACKGROUND INFORMATION PROVIDED BY GOVERNMENTS FOR THE CALENDAR YEAR 1994
